

Its time to get your well water tested for nitrates – for free!

When: Thursday, November 21st
2 PM to 6:30 PM

Where: Stockton Community Center located
on 8600 D Street, Stockton

How:

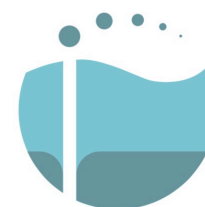

- Bring your drinking water to Stockton Community Center in a clean container or plastic baggie. Include the location and date you collected the sample and any other details about your well. Please have a minimum of one cup (8 ounces) of water. **The testing is free!**
- Test both sides of your reverse osmosis (RO) water treatment system to see how it is working.
- Bring in multiple samples to test from every well you may own regardless of the age, depth, or condition of the well. Results will only take 15 minutes.

This event is free and open to the public
